

BHS LOGISTICS

PASSION FOR SOLUTIONS - SINCE 1946

Environmental Policy

BHS Logistics is a transport company which conveys a wide variety of goods every single day throughout Denmark and to several export markets.

We want to be an active team player in improving the environment under consideration of our technical, financial and commercial framework.

Our environment policy applies to the entire company and must be observed by every employee in his/her daily function.

The aim is to achieve a safe and sound environment which allows for sustainable development. Major investments – including in the equipment used to carry out our transports – are assessed using a costing method which also calculates our carbon footprint. It also takes account of engine type (EURO norm). Diesel powered vehicles are currently preferred, as this fuel is less resource-intensive.

Each employee must ensure that our equipment is in order and minimise our use of environmentally harmful energy, with particular focus on diesel fuel, as this accounts for the company's biggest environmental impact and cost. Therefore, we need to focus on our work processes and procedures and on the technologies available at any time.

The ongoing improvement of our environmental efforts must be ensured by monitoring our energy consumption and conducting analyses of this. Our transports will be assessed on an ongoing basis in terms of whether other types of transport (road/sea/air/rail) need to be deployed or whether any equipment could advantageously convey large volumes of goods and minimise the use of resources and our carbon footprint at the same time.

We want to minimise business travel by using telephone conferences, etc., to reduce personal travel wherever possible and expedient.

BHS Logistics wants our suppliers to manifest the same respect for the environment as we do.

We comply with current law and relevant official requirements, as well as other environmental provisions adopted by BHS Logistics.

BHS Logistics environmental policy is publicly available, see our website www.bhslogistics.dk

BHS Logistics is Bureau Veritas certified.
